Helpful Travel Health Advisory – Hand Sanitizers: As you may have heard, this is a very active year for noroviruses, which produces symptoms of upset stomach, diarrhea and vomiting. The U.S. Centers for Disease Control and Prevention indicates that as many as 23 million Americans contract a norovirus on land each year. In order to minimize the risk of norovirus onboard the ship, you will see many portable hand sanitizers around the ship that are available for your use. We remind you, however, that hand sanitizers are not a substitute for hand washing with soap and hot water. All guests are strongly advised to wash their hands frequently with soap and hot water for a minimum of 20 seconds after using the bathroom and again before eating anything. This means you should wash your hands before using the hand sanitizers.
