### Dear Cruise Director,

Please tell me more about Sky Club Casino!

### From Crabs Eyes...

When you step into a casino, most of the noise will probably be coming from the Craps table. Played simply with two dice, it provides quite the adrenaline-rush and is the biggest gambling game in the history of the world in terms of money wagered. Craps is said to have originated from a dice game called Hazard, where the term "crabs eyes" was used to describe a throw of two ones. Crabs eyes shortened into "craps."

When you place a basic bet, you're wagering that the person rolling the dice will roll the number he needs to win – essentially, you're betting on how lucky the roller is. You're in no competition with the roller; you're just along for the ride.

### All In The Cards?

Legend has it that a deck of cards has numerological significance: the four suits represent the four seasons, the 13 cards per suit are the 13 phases of the lunar cycle, black and red are for day and night, the 52 cards of the deck (joker excluded) symbolize the number of weeks in a year, and finally, if the value of each card is added up – and 1 is added, which is generally explained as being for the joker – the result is 365, the number of days in a year.
