Wireless Internet Service

Dear Guest,

As you prepare to surf the web or access email, please note that connecting to the Internet while at sea involves data transmission with a satellite. While this unique arrangement allows for the freedom of Internet connectivity anywhere on the high seas, connection speeds vary and at certain times are slow.

Wireless Internet access is available throughout the ship. To sign up for Wireless access please proceed to deck 6 by the glass elevators and log ON to any of our laptop workstations and then follow the instructions below:

Step 1. Move the mouse to get started and click on anywhere on the Screen to begin. **Move your mouse on the Wireless icon** (At the right side, fourth option) and then **click**.

Step 2. Swipe your **Seapass Card** (door key), black stripe on the right side and then follow on-screen instructions in order to create username and password (anything that is easy to remember), which you will use on your laptop to access Wireless Internet.

Step 3. Connect your laptop to "Wireless Celebrity Wi-Fi". Open your Internet browser (Explorer or Mozilla Firefox) and then enter your username and password. Read the agreement before you Begin your Internet session.

Step 4. To stop Internet charges, click the **log off** button on the **Logout** window or please type in your browser: **<http://appdb.rccl.com/ekgnkm/wirelesslogin.asp>**
Close and then Open your Internet browser; it should display the "Wireless Celebrity Wi-Fi" **log on** page.

We continually strive to provide with the best service possible, and our online staff will be happy to assist you with any questions.
